NAME OF CONTRACT VENDOR	ADDRESS	PHONE NO.	CERTIFIED BY	
List or attach a list stating the general categories of nonorganic products produced by your company.				

The NOP Rule has 4 categories of products which can use the word "organic". These are "100% organic", "organic", "made with organic (specified ingredients or food group(s))", and products with less than 70% organic ingredients. The % of organic ingredients is calculated by dividing the total net weight or volume (excluding salt and water) of combined organic ingredients by the total weight or volume of all ingredients (excluding salt and water). All ingredients identified as "organic" in the ingredient list must be certified by an accredited certifying agent. Ingredients sourced from non-certified exempt or excluded operations must not be identified or used as organic ingredients.

Products labeled "100% organic" must contain 100% organic ingredients, including processing aids. Products labeled "organic" must contain at least 95% organic ingredients; nonorganic ingredients must not be commercially available in an organic form; and all synthetic ingredients and processing aids must be on the National List. Products labeled "made with organic (specified ingredients or food group(s))" must contain at least 70% organic ingredients. For "100% organic," "organic," and "made with ..." products, both organic and nonorganic ingredients must not be produced using excluded methods, sewage sludge, or ionizing radiation. Products labeled "organic" or "made with..." must not include organic and nonorganic forms of the same ingredient, except that a nonorganic ingredient in a product labeled "made with..." may contain organic and nonorganic forms of the same ingredient, but the ingredient must not be labeled as "organic" on the ingredient statement or be counted in the calculation of the product's organic percentage. Products with less than 70% organic ingredients can only identify the organic ingredients in the information panel. Refer to the National List, Section 205.605 and 205.606, to determine which nonagricultural substances and nonorganically produced agricultural ingredients are allowed in or on products labeled "organic" or "made with..."

The NOP Rule has specific requirements for principal display panel information relating to the use of the term "organic", depending on the % of organic ingredients in the finished product. For all products, the organic ingredients must be identified in the ingredient information panel. Up to three ingredients or food groups can be listed on the principal display panel for products labeled as "made with organic (ingredients or food group(s))". The term "organic" cannot be used to describe a nonorganic ingredient in a product name. Water and salt cannot be identified as "organic". The name of the certifying agent must be identified on the information panel below the name of the handler or distributor, preceded by the statement, "Certified organic by..." or similar phrase. The address and telephone number of the certifying agent may be displayed.

The USDA seal can be used on "100% organic" or "organic" products, but not on products labeled "made with...". A certifying agent's seal, logo or other identifying mark can be used on "100% organic," "organic" or "made with...". Products with less than 70% organic ingredients cannot use either the USDA seal or the certifying agent's name, seal or logo. The certifying agent's seal cannot be displayed more prominently than the USDA seal. Use of the USDA or Baystate Organic Certifiers seal is voluntary and not required by the NOP.

Attach an Organic Product Profile sheet and examples of all labels used for each product requested for certification.
